

REGISTRATION

We ask for your registration under the following link:

www.uk-live.de/leipzig-school

We will inform you in good time by e-mail about any access and hygiene regulations for attendance due to SARS-CoV-2.

PARTICIPANT FEES

Block C: EMMR, LEER and tLINE	1.600 €
Block A: TMMR	1.600 €
Block B: VFR + AR	1.600 €
Combined offer: A + B	3.000 €

CERTIFICATION

The event is recognized by the Saxon State Medical Association with 28 category A points per event.

SCIENTIFIC DIRECTION

Bahriye Aktas, M.D.; Michael Höckel, M.D., Ph.D.
Department of Gynecology

CONTRIBUTORS

Nadja Dornhöfer, M.D.; Benjamin Wolf, M.D.;
Laura Weydandt, M.D.
Department of Gynecology
Ingo Bechmann, M.D.; Sabine Löffler, M.D.

DEPARTMENT OF GYNECOLOGY

LEIPZIG SCHOOL OF RADICAL PELVIC SURGERY 2023

Seminar with cadaver workshop
and transmission from the operating
room

March 20–22, 2023
September 4–6, 2023
October 16–18, 2023

DEAR COLLEAGUES,

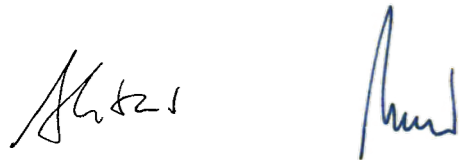

to achieve the educational goals of the Leipzig School, three times a year in spring and fall courses on the new surgical therapy of malignant disease of the lower female genital tract are held at the University of Leipzig Medical Center.

The courses are addressed to advanced gynecologic surgeons but also to colleagues who are interested in getting to know the new operations. The courses comprise lectures, anatomical workshops and live surgery in an interactive format for a small group of international participants. The limited number of attending colleagues ensures intensive learning and in-depth discussions with the faculty members.

The courses consist of 3-day blocks.
Course language is English.

In the rare case that no patient is available for the live-demonstration of the surgical techniques of a specific course topic, a video of the operation in full length with live comments will be presented.

We are looking forward to welcoming you in Leipzig.

Bahriye Aktas, M.D. Michael Höckel, M.D., Ph.D.

PROGRAM

Block C: EMMR, LEER and tLNE* March 20–22, 2023

- Principles and practice of current surgical treatment for vaginal and locally advanced and recurrent cervix carcinoma
- Introduction to the ontogenetic cancer field model
- Ontogenetic anatomy of the female pelvis with special consideration of the vagina
- Cancer fields of vaginal carcinoma
- Pathoanatomy of pelvic recurrences of cervix carcinoma
- Cancer fields of advanced and recurrent cervix and vaginal carcinoma
- Regional metastatic pattern of advanced cervix and vaginal carcinoma
- Abdominoperineal TMMR, EMMR & tLND: principles, techniques, results
- LEER & tLND: principles, techniques, results

* EMMR: extended mesometrial resection
LEER: laterally extended endopelvic resection
tLNE: therapeutic lymph node dissection

Block A: TMMR** September 4–6, 2023

- Principles and practice of current surgical treatment of cervix carcinoma
- Introduction into the ontogenetic cancer field model
- Ontogenetic anatomy of the female pelvis with special consideration of the uterine cervix
- Cancer fields of cervical carcinoma, ontogenetic staging (oT)
- Pathomechanisms of lymphatic metastasis
- Cancer field model of regional tumor spread
- Development of the human lymphatic system: the abdominopelvic lymph territories in the female
- Regional metastatic pattern of cervical carcinoma, ontogenetic nodal staging (oN)
- TMMR & tLND: principles, step-by-step technique, results, comparison with conventional surgical treatment

** TMMR: total mesometrial resection

Block B: VFR + AR*** October 16–18, 2023

- Principles and practice of current surgical treatment of vulvar carcinoma
- Introduction to the ontogenetic cancer field model
- Ontogenetic anatomy of the female perineum with special consideration of the vulva
- Cancer fields of vulvar carcinoma, ontogenetic staging
- Pathomechanisms of lymphatic metastasis
- Cancer field model of regional tumor spread
- Development of the human lymphatic system: the inguinopelvic lymph territories in the female
- Regional metastatic pattern of vulvar carcinoma, ontogenetic nodal staging (oN)
- VFR+AR & tLND: principles, techniques, results, comparison with conventional treatment

*** VFR: vulvar field resection
AR: anatomical reconstruction
